

FINAL PROJECT

Create a new Wordpress project that does the following:

1. Create a wordpress project using MAMP.

2. Open the testsite to verify it is loading with default settings.

3. Create a custom theme and activate it.

4. Create 10 posts using Fakerpress.

5. Create three pages namely Home, About US and Contact US.

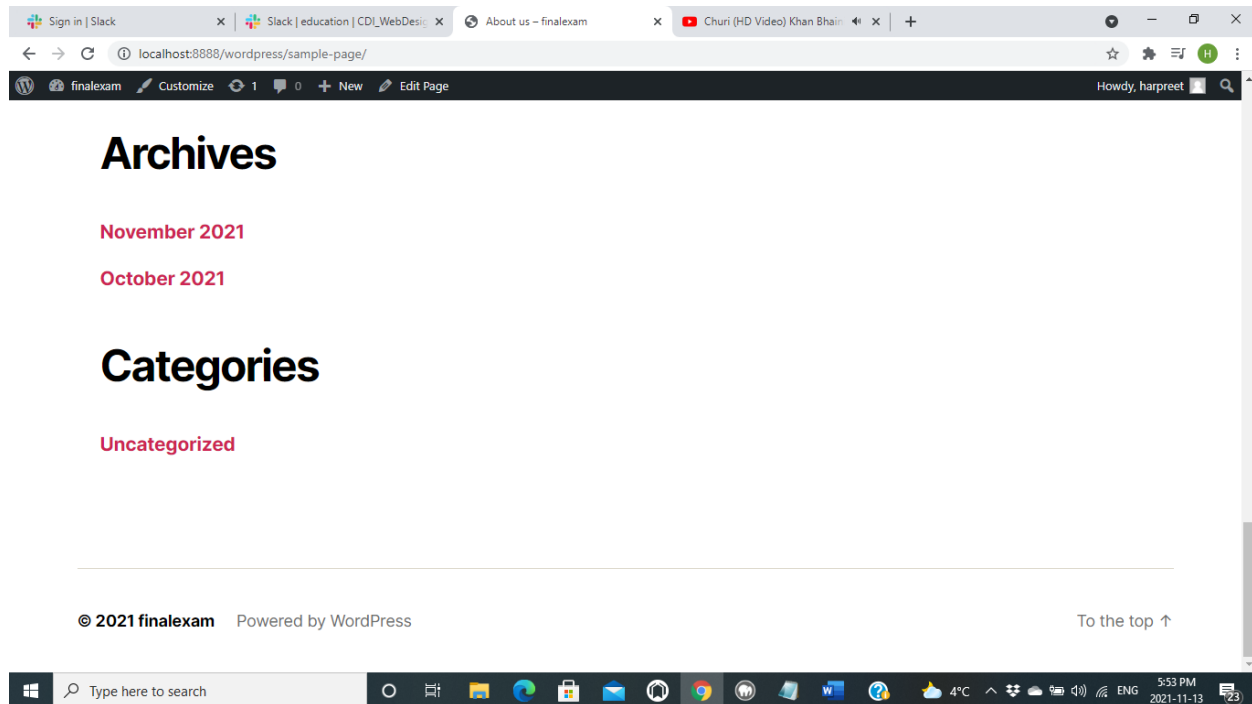

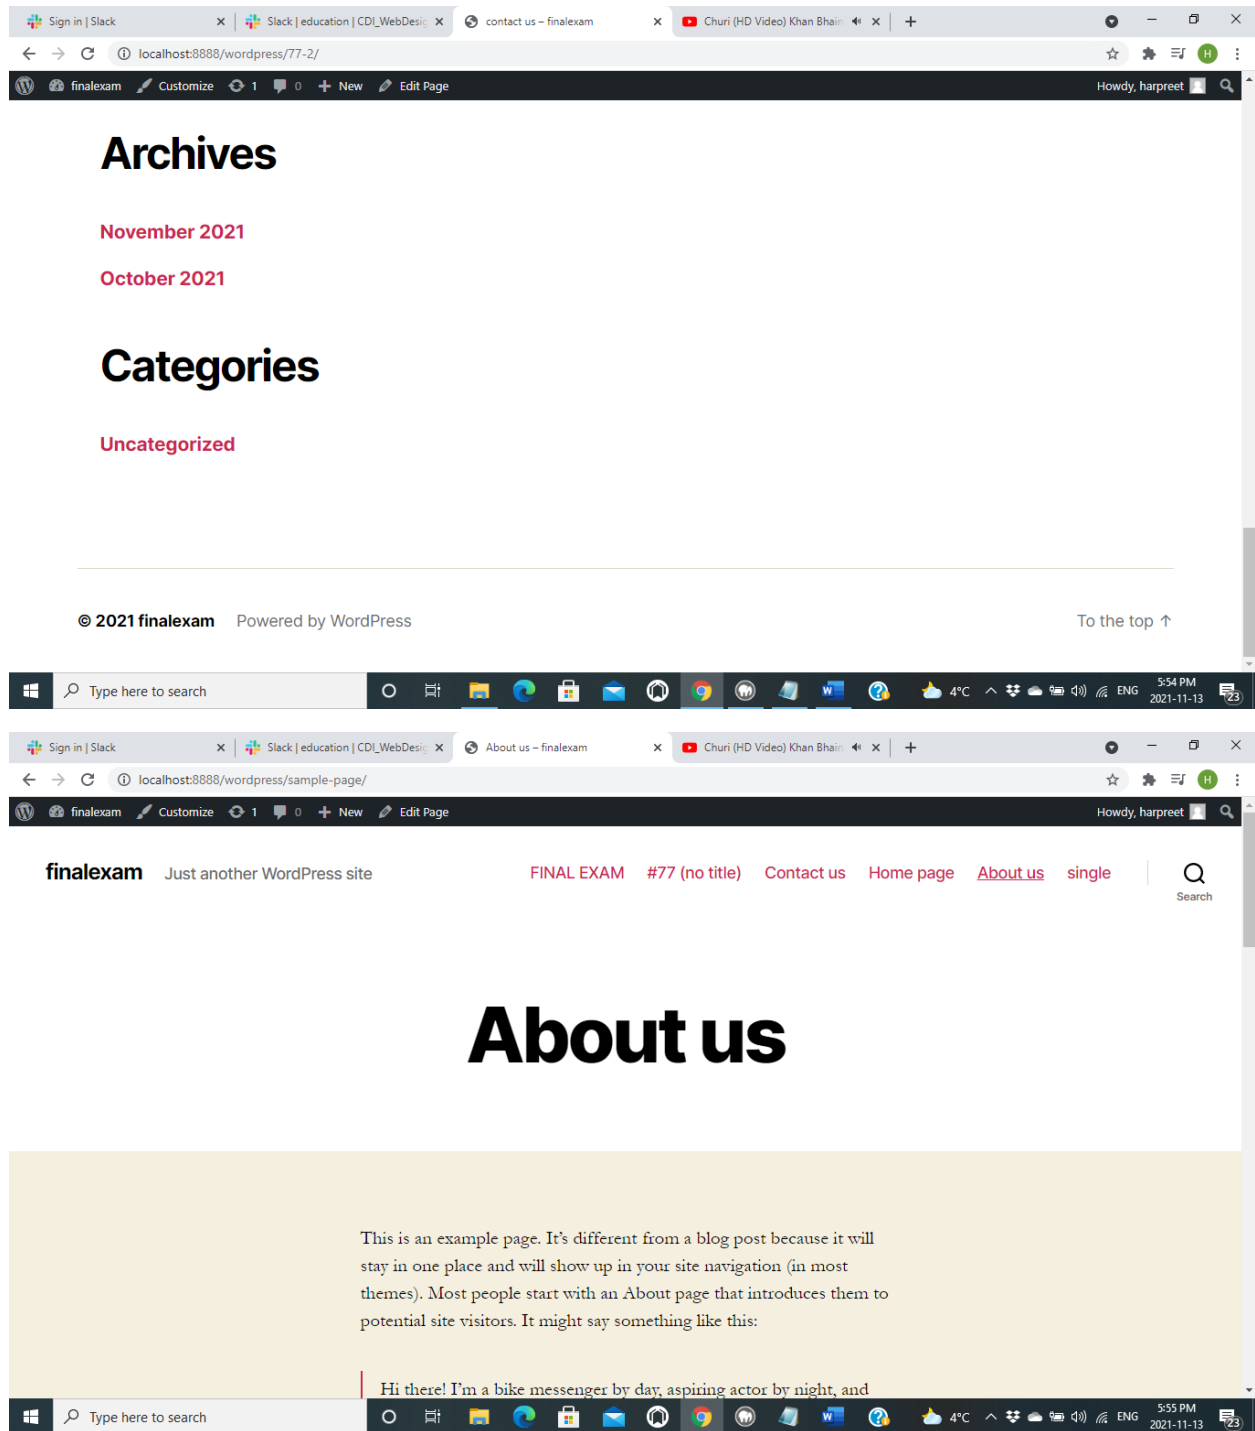

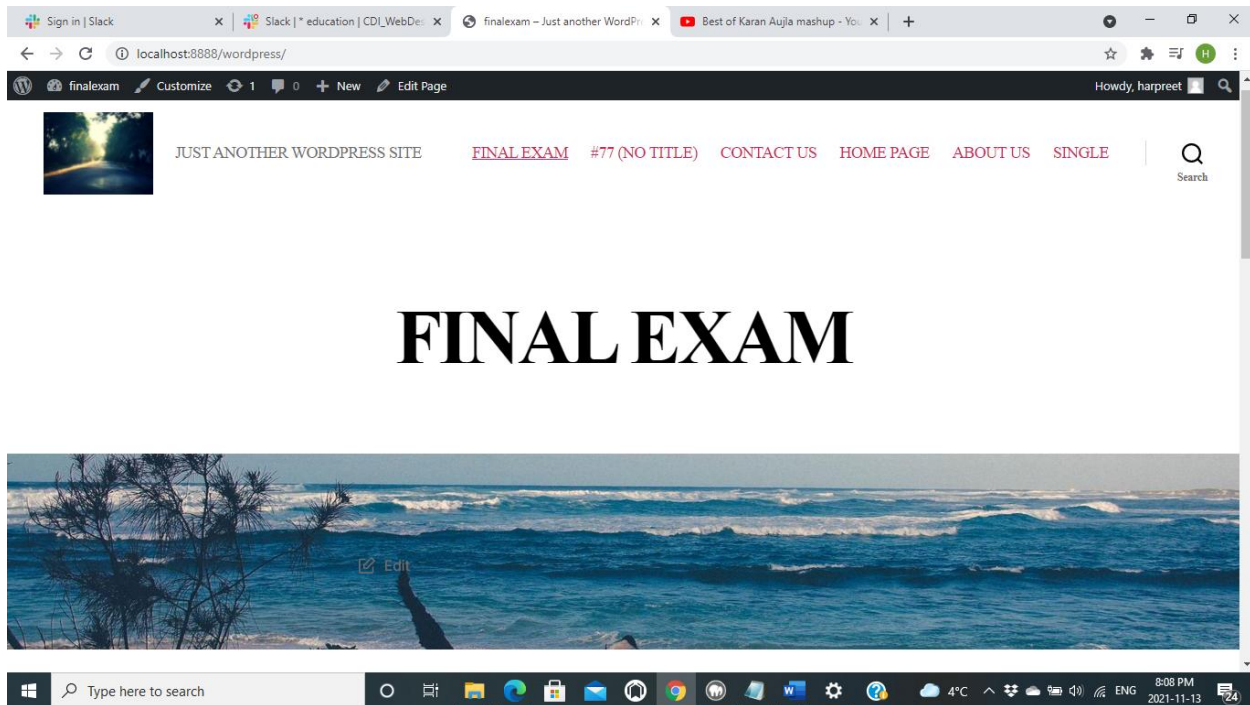

6. All the pages should have a header, footer respectively.

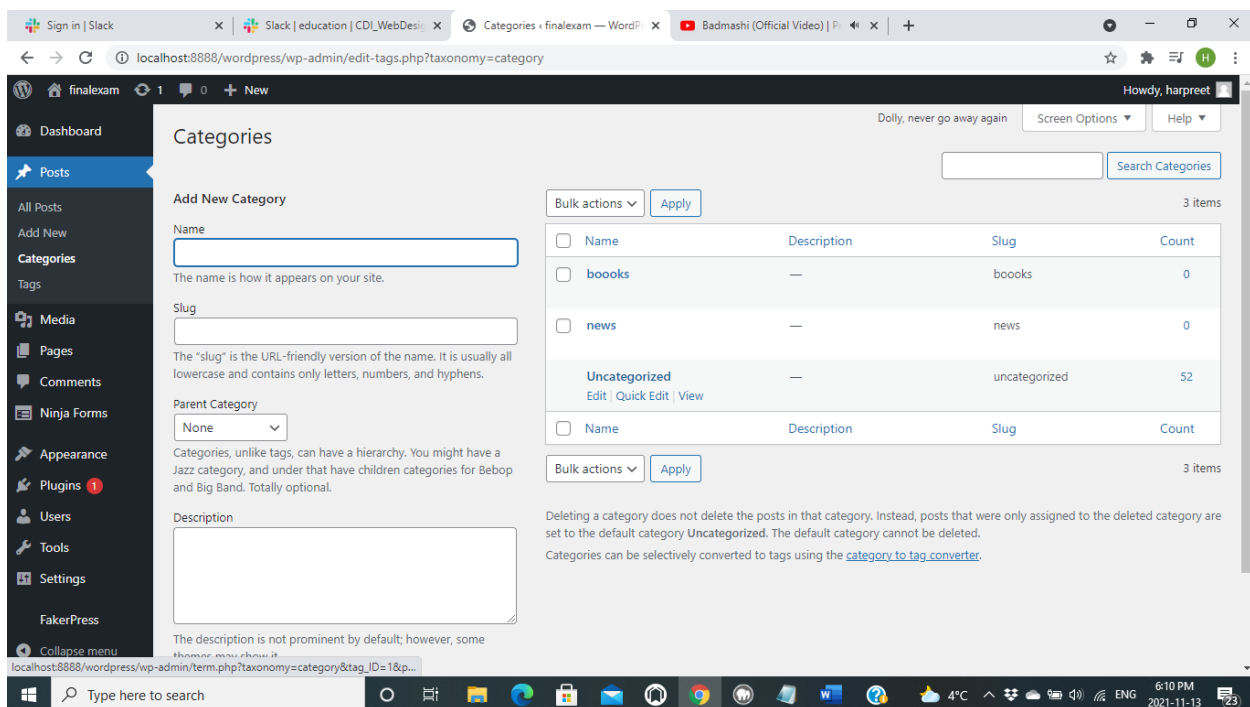

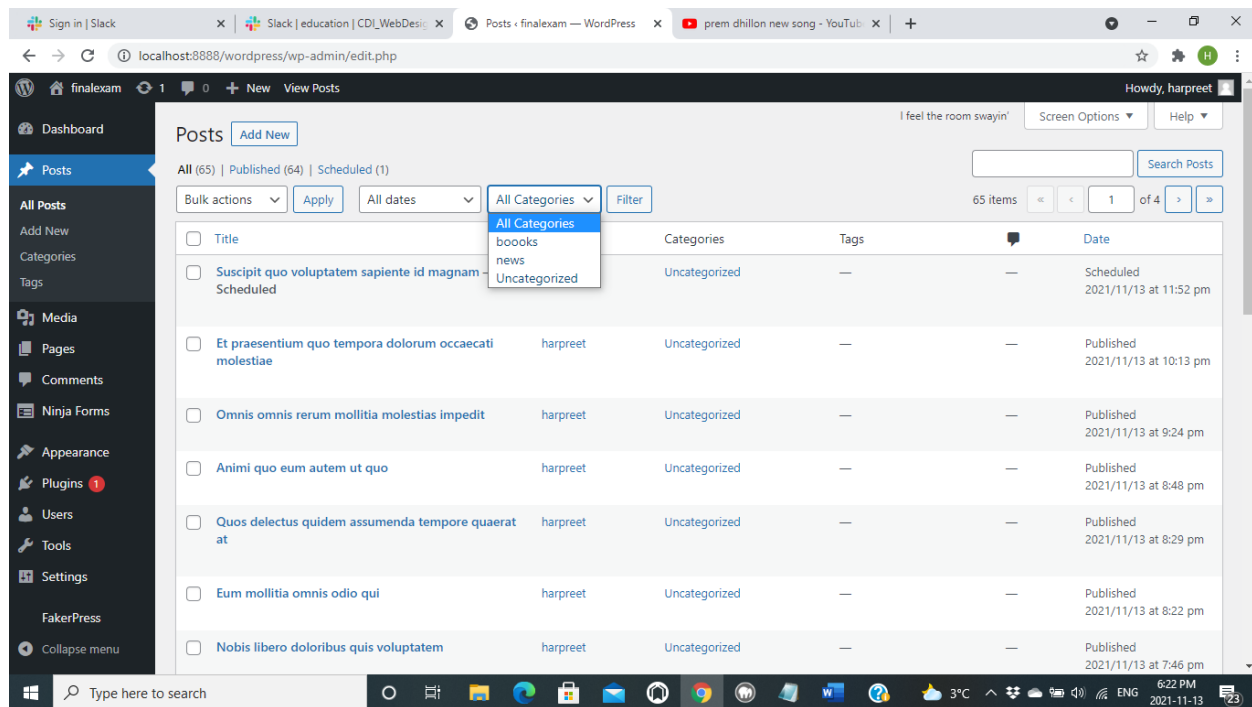

7. Give a logo to your page and integrate it.

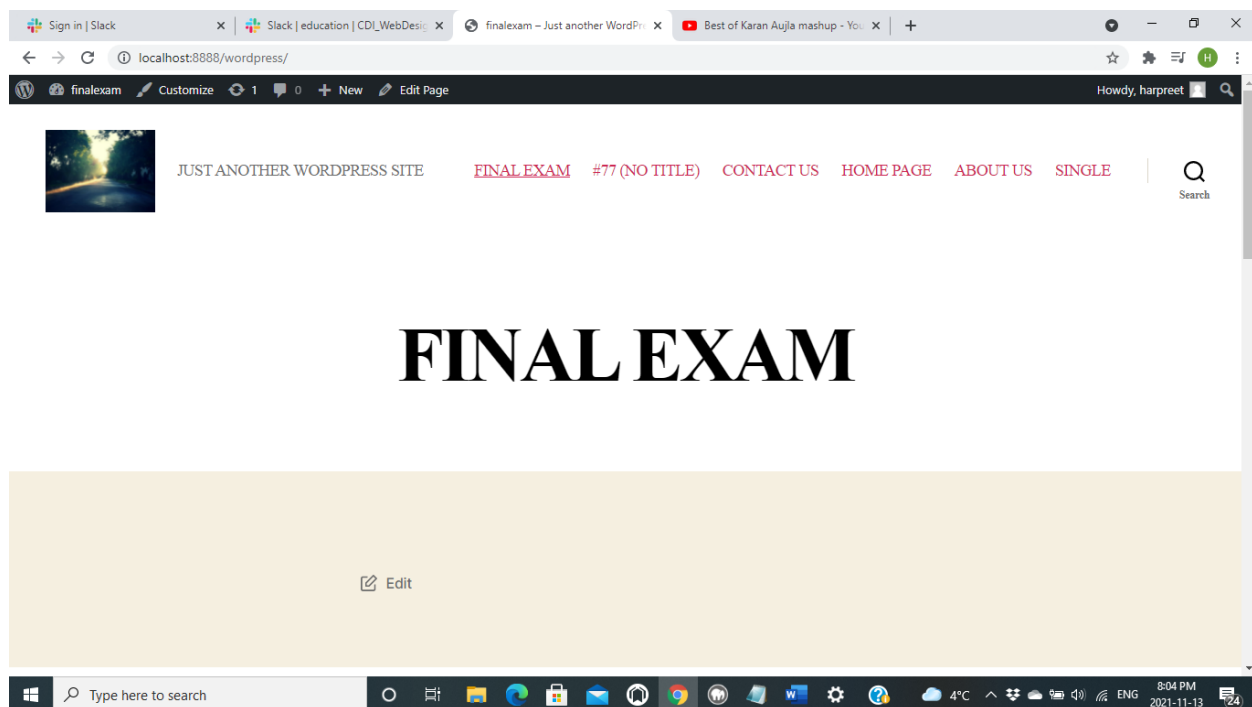

8. Create atleast two categories for your page's posts.

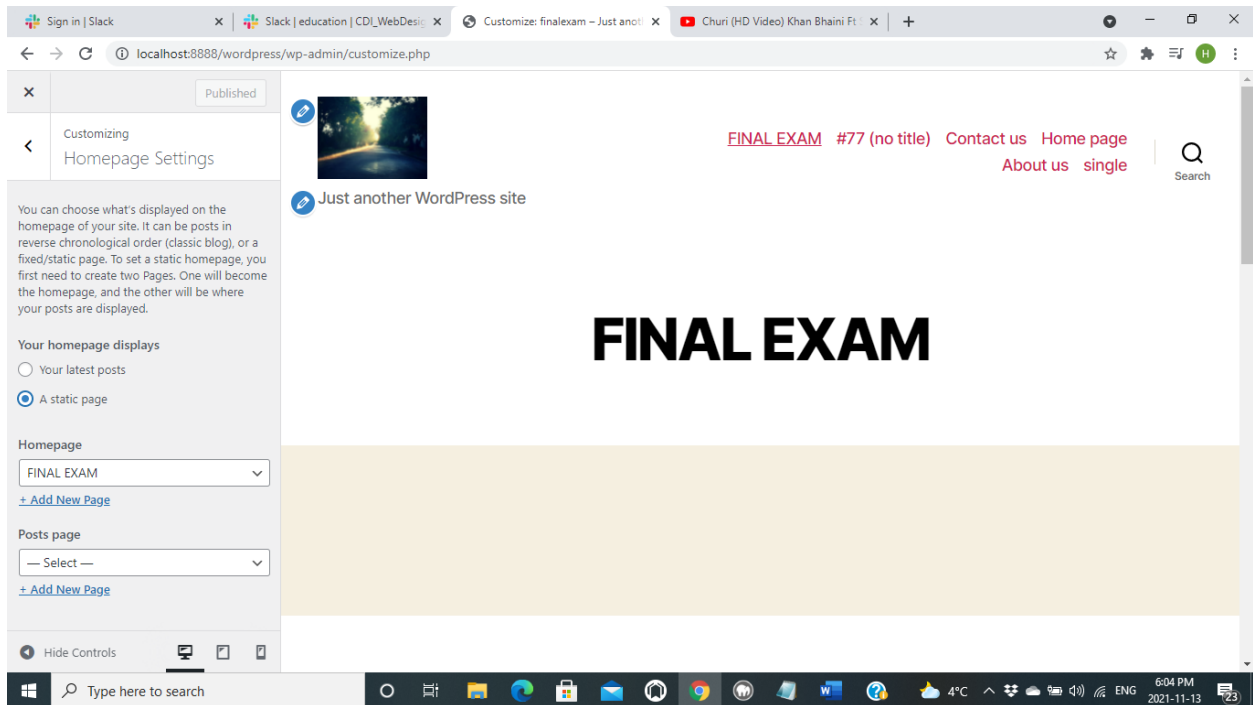

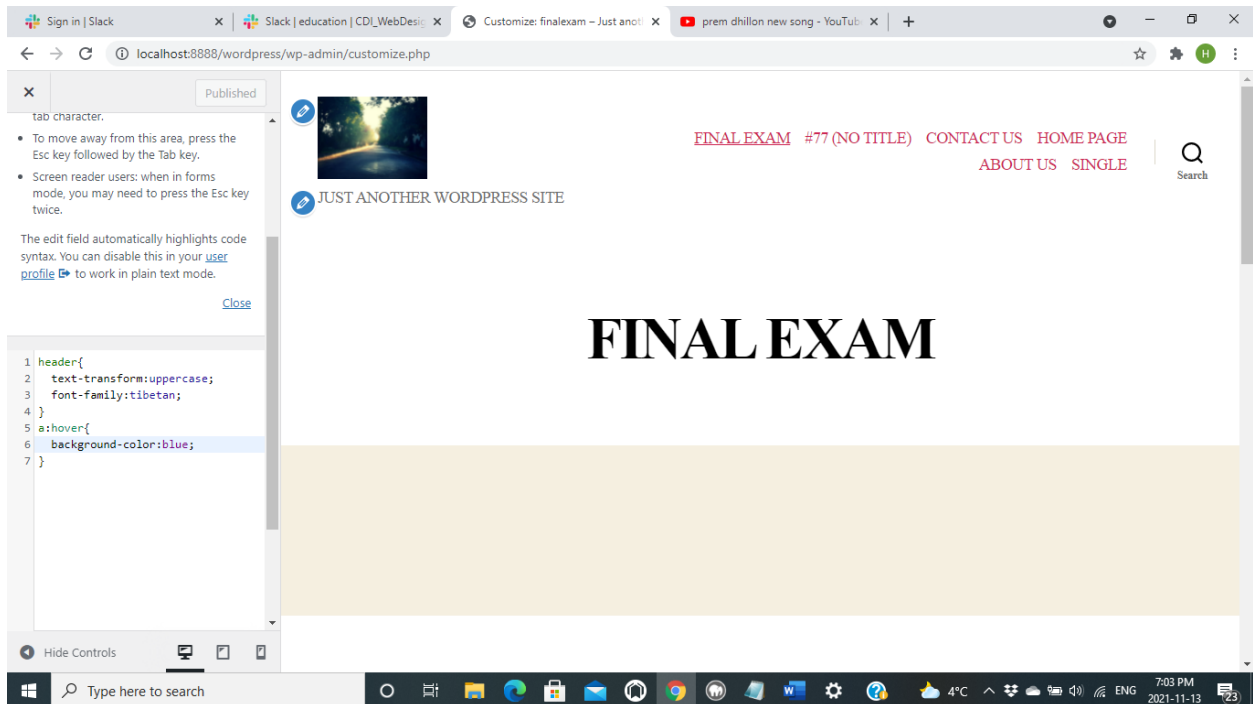

9. Have the 5 major template files integrated to your project.

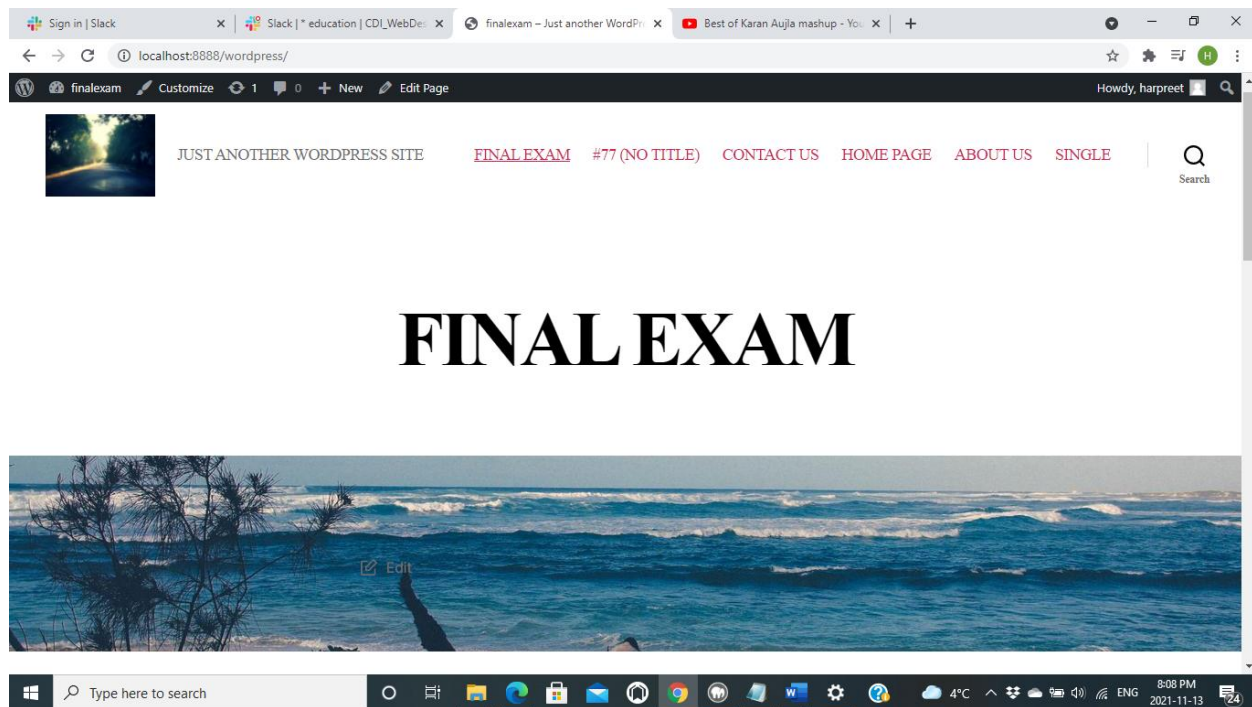

10. Change the homepage setting.

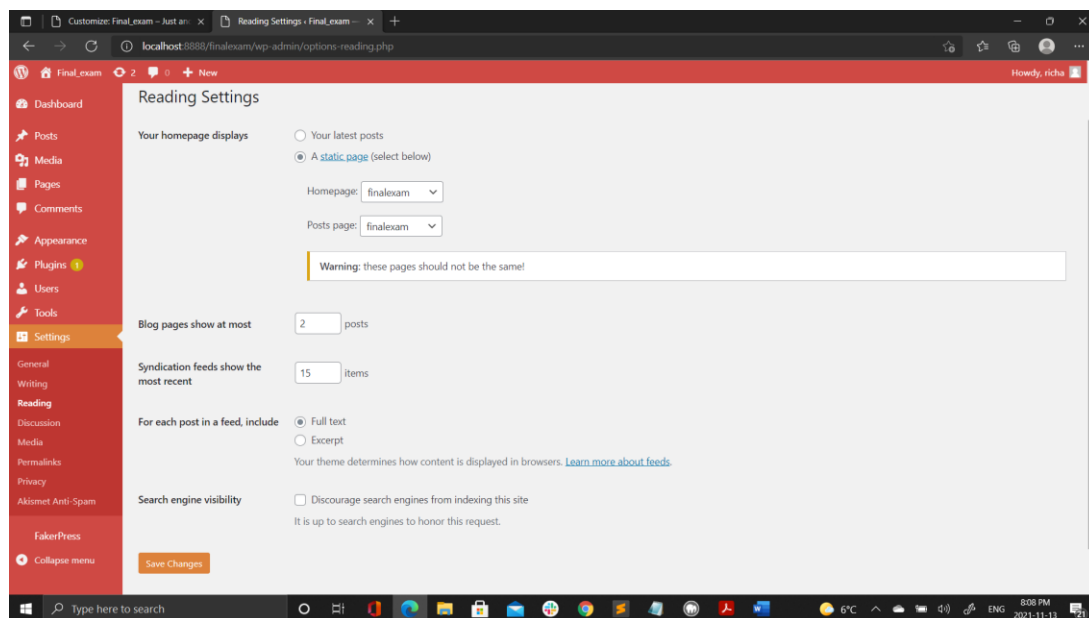

11. Edit the theme file by adding a custom css. Change atleast three different css properties.

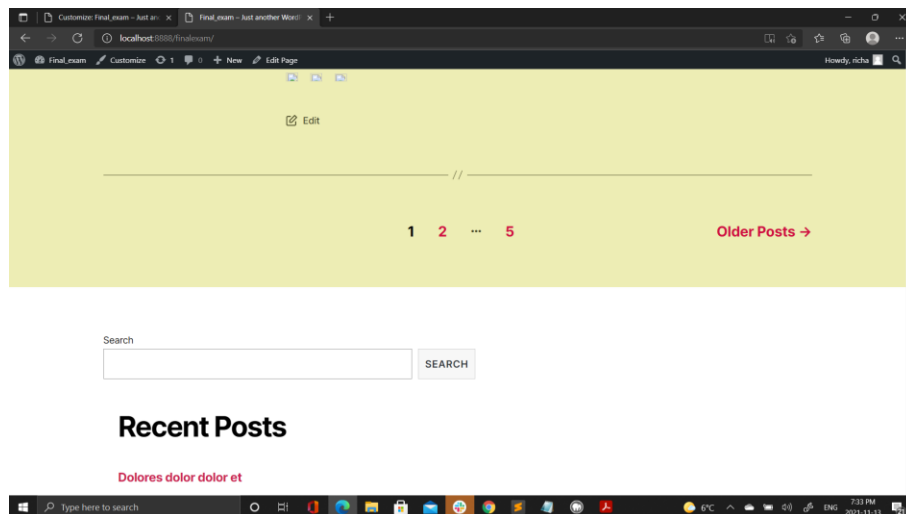

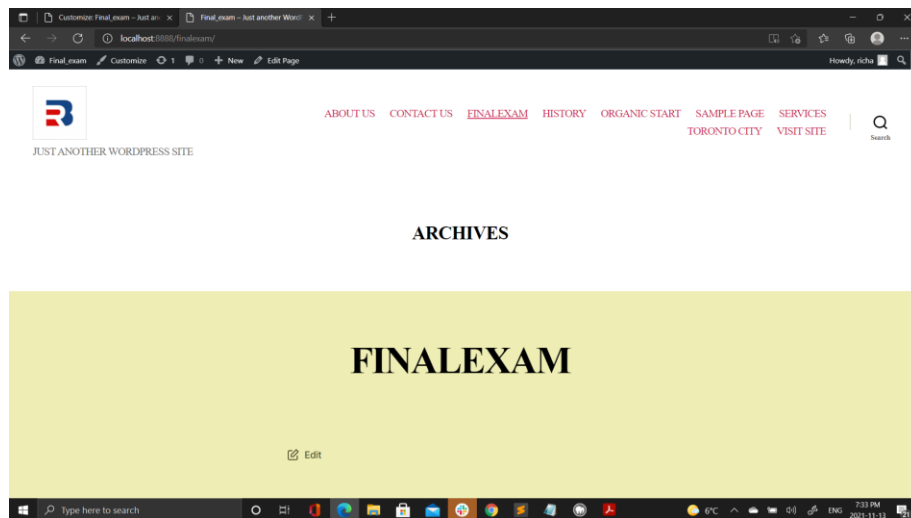

12. Add a thumbnail by using hooks.

13. Enable pagination for your posts. (Have 20 posts to test this)

14. Change the comments settings and use akismet anti spam tool.

Submission.

1. Create a word file.
2. For every question above include relevant screenshots under the question.
3. Submit the pdf version of answers onto github and share the github link on slack.
4. Upload all the wordpress files onto github by creating a new repository(mandatory)
5. Use #general to submit the links.
6. Time: Till end of day.
